

Updated: April 2, 2021

Our Nondalton Emergency Response Team has just met and decided to Re-open our community for Travel.

1. What does that mean?

Personal or Medical Travel is allowable again! CDC recommends delaying travel until you are fully vaccinated, because travel increases your chance of getting and spreading COVID-19.

2. Can I travel to another neighboring community (Newhalen, Iliamna) for Essential needs at the store?

Yes, you may, but other neighboring communities do have COVID 19 Health Mandates. Please educate yourself on the current Health Mandates of Newhalen/Iliamna.

- **We currently have zero (0) active COVID 19 cases in Nondalton. Let's try to keep it that way, by social distancing, wearing a face mask, avoid large gatherings, getting the COVID 19 vaccine and by putting all Non-Emergent travel on hold until you have received the COVID 19 vaccine.**
- **Please Help our Community by wearing a face mask, washing your hands, social distancing and avoid gathering in large groups. Please, No visiting at another household's house if you are NOT fully vaccinated.**
- **I've been fully vaccinated: What can I do? These are the CDC recommended guidelines from their website.**
 1. You can gather indoors with fully vaccinated people without wearing a mask or staying 6 feet apart.
 2. You can gather indoors with unvaccinated people of any age from one other household (for example, visiting with relatives who all live together) without masks or staying 6 feet apart, unless any of those people or anyone they live with has an increased risk for severe illness from COVID-19.
 3. If you travel in the United States, you do not need to get tested before or after travel or self-quarantine after travel. **Each State has their own COVID 19 travel restrictions. Please educate yourself prior to travel within the United States.**
 4. You need to pay close attention to the situation at your international destination before traveling outside the United States.
 5. You do NOT need to get tested before leaving the United States unless your destination requires it.
 6. You still need to show a negative test result or documentation of recovery from COVID-19 before boarding a flight to the United States.

7. You should still get tested 3-5 days after international travel.
8. You do NOT need to self-quarantine after arriving in the United States.
9. If you've been around someone who has COVID-19, you do not need to stay away from others or get tested unless you have symptoms.
10. However, if you live in a group setting (like a correctional or detention facility or group home) and are around someone who has COVID-19, you should still stay away from others for 14 days and get tested, even if you don't have symptoms.

- **What You Should Keep Doing For now, if you've been fully vaccinated: These are CDC recommended guidelines from their website.**

1. You should still take steps to protect yourself and others in many situations, like wearing a mask, staying at least 6 feet apart from others, and avoiding crowds and poorly ventilated spaces. Take these precautions whenever you are:
 - In public
 - Gathering with unvaccinated people from more than one other household
 - Visiting with an unvaccinated person who is at increased risk of severe illness or death from COVID-19 or who lives with a person at increased risk.
2. You should still avoid medium or large-sized gatherings.
3. If you travel, you should still take steps to protect yourself and others. You will still be required to wear a mask on planes, buses, trains, and other forms of public transportation traveling into, within, or out of the United States, and in U.S. transportation hubs such as airports and stations. Fully vaccinated international travelers arriving in the United States are still required to get tested within 3 days of their flight (or show documentation of recovery from COVID-19 in the past 3 months) and should still get tested 3-5 days after their trip.
4. You should still watch out for symptoms of COVID-19, especially if you've been around someone who is sick. If you have symptoms of COVID-19, you should get tested and stay home and away from others.
5. You will still need to follow guidance at your workplace.

We will Meet again on May 7th.
